

Product Introduction

Velcro roll cutting and coiling taping ends machine

ES-127

【Product Description】

The Velcro roll cutting and coiling taping ends machine machine ES-127 is designed specially for automatic cutting velcros into length , coiling into rolls and taping the ends to a fixed rolls .

This self adhesive velcro cutting winding machine is widely applicable to process self adhesive velcro , hook and loop velcros and normal velcros etc.

The cutting length ranges 1to 50meters ,the processing material thickness ranges 1-3mm, the maximum processing material width is 40mm , the maximum material roll diameter before processing is 500mm and the maximum diameter velcro roll after processing is 200mm .

Product Introduction

The output is 1-9rolls /min based on the length of coiling rolls , this velcro roll cutting and coiling taping ends machine is also able to count how many meters of velcros had been processed and display on the touch screen for recording purpose .

Say goodbye to manual cutting and coiling into rolls , The ES-127 Velcro roll cutting and coiling taping ends machine automates cutting ,coiling and taping ends process in one machine which is high productivity and laboring saving for customers which manufacture large quantity of velcro rolls .

【Technical Data】

Product name : Velcro roll cutting and coiling taping ends machine

Model No.: ES-127

Main advantage : Cutting + coiling +taping ends in one machine

Voltage: 220V

Machine power: 1.65KW

Air pressure :0.7MPA

Operating system : PLC Touch screen

Cutting length: 1-50meters

Material thickness: 1-3mm

Maximum material roll diameter after processing :200mm

Maximum material diameter before processing :500mm

Maximum processing material width :40mm

Roll core :16mm

Output : 1-9rolls/min

Net weight : 135KG

Product Introduction

Machine dimension : 1500mmX650mmX1300mm

【Product Advantage】

1,Count meters ,the machine can count how many meters of velcro had been processed

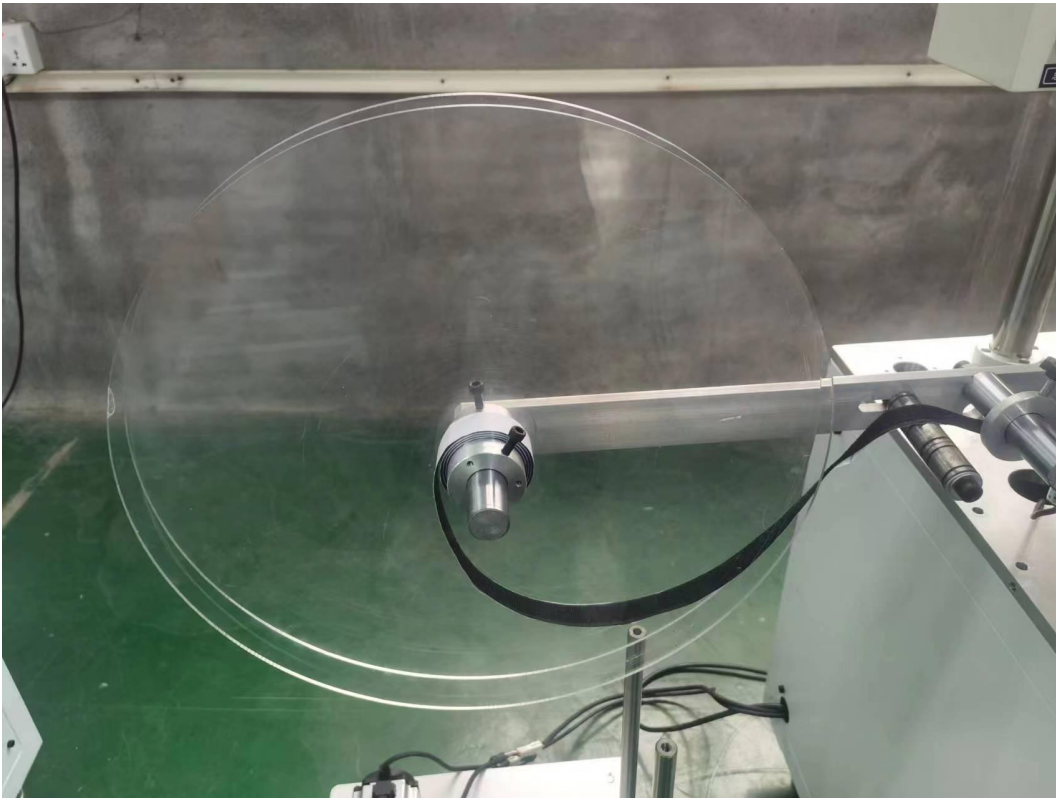

2,Automatic cutting velcro into length +coiling velcro into rolls +taping the ends of velcro rolls in one machine , high productivity and labour saving

3,Widely applicable to hook and loop velcros , self adhesive velcros with backing tapes , normal velcros

【Product Details】

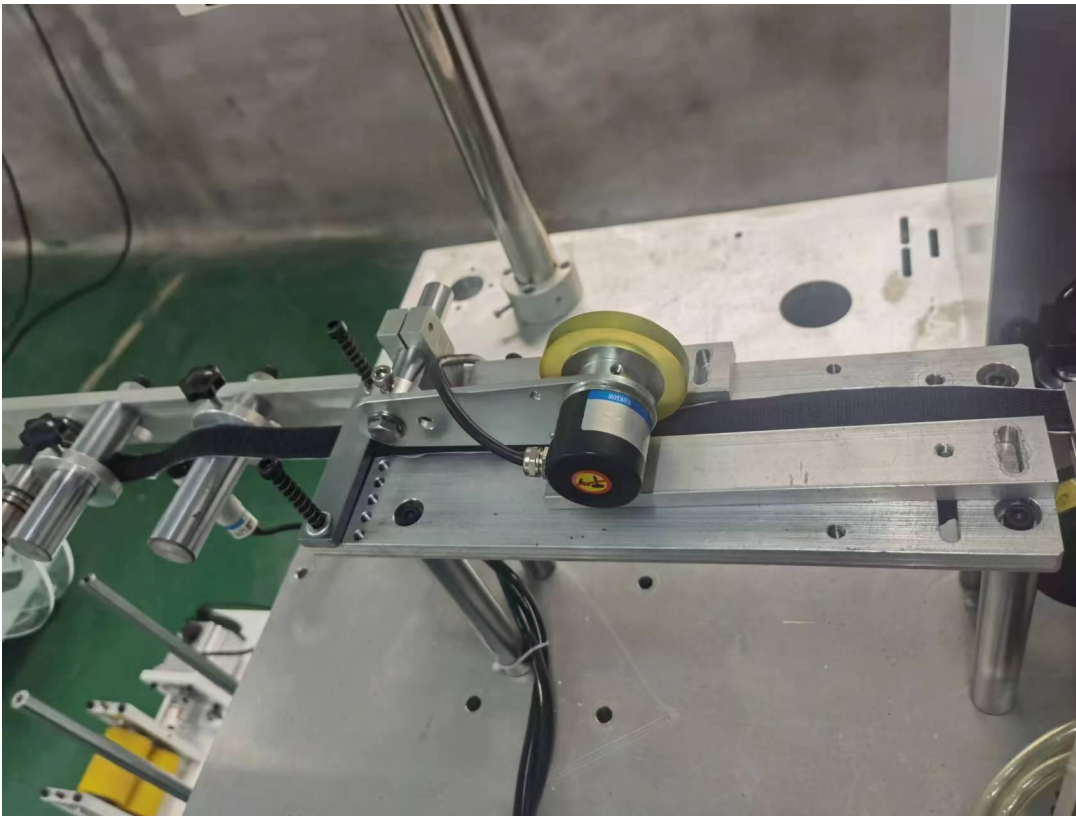

1,Holding boards , the hold boards can adjust their width and hold velcro roll material above 500mm diameters

Product Introduction

2,Count meters this self adhesive velcro cutting coiling roll machine can count how many meters of velcro material had been processed for better recording purpose .

Product Introduction

3, Clipping hands & taping ends ,the clipping hands will draw the velcro to the cutting knife and cut off , winding device will wind velcro into rolls and tape up the ends to form a fixed velcro rolls .

Product Introduction

Add:Room 103, Building 8th, Dacheng Industrial Zone, Buji Street, Longgang District, Shenzhen,China
Mobile phone: +86-188 1188 0172
Email:sales@cnesmai.com Website:www.chesmai.com

Product Introduction

4,Touch screen , the hook and loop velcro cutting coiling machine applies with touch screen and simplified control buttons which is easy to operate , customer can set the velcro cutting length ,machine working speed ,etc .
